

In the latest delegation…

&muδδσ; Fell, process and deck all trees and snags that represent an **imminent and/or likely** hazard to firefighter safety on road systems during ongoing mop-up, patrol, and repair operations. Byproducts from fire line construction and hazard tree felling from suppression activities will be decked in coordination with the Lead READ and Timber REAF.

Intent

Imminent = fire-weakened and obvious
Likely = scorched roots and bole and may have a green canopy

Subject: Hazard, danger tree discussion and intent

Hi,

I wanted to share what we did last year for turn back standards and this year for leader’s intent around hazard tree abatement. As we move into suppression repair, it might be helpful to have a group conversation around expectations with the next team, READS, etc so that the turnback standards, delegation and repair plan are aligned around hazard and danger tree abatement. I know Coville is coming Sunday to provide some intel as well. I would suggest we chat on Monday before the inbriefing so we can update documents in time. Just my 2 cents.

From current leader’s intent:

&muδδσ; Byproducts from large fire line construction and hazard tree felling from suppression activities will be decked off site during suppression in coordination with the Lead READ and Timber READ.

From 2017 Turnback Standards:

&muδδσ; Fall all trees and snags that represent a hazard to firefighter safety on road system during ongoing mopup, patrol, and repair operations.

Thanks!
Holly
